

SUNJET II

SUstainable Network for Japan-Europe aerospace research and Technology cooperation II

Coordinator: FR-AGI-F

Project Participants: FR-AEROSPACE VALLEY, UK-BAES, DE-DLR, BE-EASN TIS, NL-NLR, FR-ONERA

Project Start Date: 01/12/2014 • Project End Date: 01/06/2017

SUNJET II is dedicated to enhance relations between EU-Japan in the field of aviation. The project will create roadmaps in the fields of Airframe, Engine, Systems and Equipment with the support of the Industry, R&T Institutions, Academia and Clusters Communities.

Within the project a database will be developed, connecting all roadmaps and providing guidance and best practices for Europe-Japan joint research projects. A collaboration platform will also be set up promoting effectual communication, networking and collaboration opportunities for EU-Japan activities of mutual benefit.

SUNJET II will contribute to deepen and widen cooperation with Japan and to open new application domains for future aeronautics EU-Japan cooperation agreements, aiming at EU-Japan compatibility, better interfacing and paving the road for common regulations, rules and procedures as well as the use of interfaced or common subsystems, equipment and tools.

In addition a boost will be given to some future joint ventures aiming at the future development of new ambitious products, better adapted to future market needs.
